**Book Summary for *When Billy Went Bald* by Julie C. Morse**

Billy is 5 years old. He is bald.

Some of the other kindergarteners tease Billy because he has no hair. But there's a special reason that Billy is bald—he has cancer.

Billy's doctor knows how he can make him better, but first he has to have an operation to take the cancer out. Then Billy has chemotherapy, and that medicine is what makes him lose his hair. It's not fun, but he needs it to get better.

Billy's teacher helps the other children understand that just because he is bald on the outside doesn't mean that he is any different on the inside. Soon Billy is playing soccer with the boys and running from the girls on the playground. Billy is better!
